ONLINE SUMMER SCHOOL

WATER TREATMENT

July 5-18, 2021

**JOIN THIS SUMMER COURSE AND MAKE THIS
IMPORTANT NATURAL SOURCE USABLE AGAIN!
WHAT ARE YOU WAITING FOR?**

ECTS credits: 3.0

**Ural Federal
University**

BRIEF DESCRIPTION

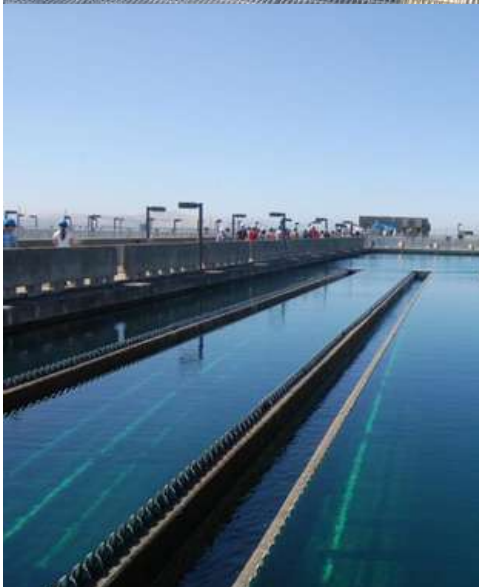

Drinking water is necessary for people as well as clean air. The students chooses the project most appropriate to the conditions of their home region. As part of the project, they develop an order (algorithm) for solving the problem on the basis of what kind of water is used for drinking, which sources of pollution are major in the region (industrial enterprises, organic pollution, chemicals from agriculture, etc.). The volume of water reserves and the load on it are taken into account.

Cost:
US\$200

Includes:

Trainings and lectures, handouts, consulting, software programs (if needed), culture activities, certificate and reference letter.
